Versatile excavator with adjustable width for efficient use in various applications—smooth movement in confined spaces, as well as powerful operation in open areas

■ **Minimum width: 780 mm**

■ **Powerful Engine**

■ **Rear end swing radius: 825 mm**

Compact Body with Short Rear End

The compact short rear end design allows efficient operation even in confined spaces.

Retractable Undercarriage and Blade

The unit can extend up to 1 000 mm during jobs, thanks to the retractable undercarriage and blade.

Notes: Some of the pictures in this catalog show an unmanned machine with attachments in an operating position. These were taken for demonstration purposes only and the actions shown are not recommended under normal operating conditions.

Powerful Operation

Two Travel Speeds Provided

Two different travel speeds are available: high (4.0 km/h) and low (2.0 km/h)—making transport of the machine through the jobsite more efficient and smooth. A new tread pattern is adopted for the rubber shoe and operating vibration suppressed.

- Travel speeds: High 0 to 4.0 km/h
Low 0 to 2.0 km/h

Powerful, Large Exhaust Capacity Three-Cylinder Engine

Packing substantial power for tough excavating jobs.

- Engine rated power: 9.5 kW
- Total piston displacement: 854 mL (cc)
- Bucket digging force: 11.8 kN

Hydraulic Pilot Control Levers

Hydraulic pilot control levers provide smooth control and easy operation.

Outside Flange Type Lower Roller

Riding comfort is enhanced due to the increased horizontal stability.

Comprehensive Safety Features

Lock Lever Allows Lock/Neutral Engine Starting

A lock lever lets you shut off not only Front & Swing but also traveling operation. A neutral engine start feature is also provided, allowing engine start only when the lock lever is at the lock position.

Easy-Access Ignition Switch, Easy-View Monitor

Simple, easy-to-understand status indicators.

Collapsible Roll Bar

The collapsible roll bar conforming to TOPS* makes the unit more compact for greater ease in transporting.

* TOPS: Tip-Over Protection Structure
(for preventing injury in tipping accidents)

Wealth of convenient design features

- Hinged seat
- Fuel tank capacity of 16 Liters
- Neutral engine start feature

Simple, Time-Saving Maintenance

Hinged Seat

Since the seat can be tipped forward, it can be used immediately after rainy weather, without the need for cleaning.

High-Capacity Fuel Tank with Wide Inlet

Thanks to the high-capacity fuel tank, operating time between refueling has been extended.

- Tank capacity: 16 L

Wide-Opening Cover

The machine cover opens wide for easy maintenance and cleaning of the radiator.

Rugged Construction and High Durability Throughout

Main Frame Protects The Body from Shocks

Single-unit counterweighted main frame effectively protects the body from unexpected shocks.

Movement Principle of HN Bush

Oil is shown seeping in this photograph, for purposes of illustration.

HN Bushing

Reliable, job-proven HN bushings are used at all pin joints at the front and the blade. The lubrication intervals have been extended to 500 hours, contributing to reduced scraping and grinding of the pins and bushings.
